Excluding systemic tumor emboli caused by left atrial myxomas, tumor emboli large enough to cause symptomatic cerebral ischemia are quite rare. The sites of tumor emboli reported most frequently are the aortic bifurcation or femoral vessels (50%) and the cerebral circulation (30%).

### **Spontaneous Systemic Tumor Embolism Caused by Tumor**

A brain tumor is a growth of abnormal cells in the tissues of the brain. Brain tumors can be benign, with no cancer cells, or malignant, with cancer cells that grow quickly.

### **Brain Tumor | MedlinePlus**

A brain tumor occurs when abnormal cells form within the brain. There are two main types of tumors: malignant or cancerous tumors and benign tumors. Cancerous tumors can be divided into primary tumors, which start within the brain, and secondary tumors, which have spread from elsewhere, known as brain metastasis tumors.
