The pressure transducer was researched to reach the IEEE 1451 functionality, better pressure ranges and lower price. It is typically prepared for paper and chemical industry, medicine appliances and pharmacy: designed to 0 ... 10 kPa up to 0 ... 6 MPa pressure ranges, accuracy according to IEC 60770 0.5% FSO.

IEEE International Electron Devices Meeting (IEDM) is the world's preeminent forum for reporting technological breakthroughs in the areas of semiconductor and electronic device technology, design, manufacturing, physics, and modeling. IEDM is the flagship conference for nanometer-scale CMOS transistor technology, advanced memory, displays, sensors, MEMS devices, novel quantum and nano-scale ...

Microelectromechanical systems (MEMS, also written as micro-electro-mechanical, MicroElectroMechanical or microelectronic and microelectromechanical systems and the related micromechatronics) is the technology of microscopic devices, particularly those with moving parts. It merges at the nano-scale into nanoelectromechanical systems (NEMS) and nanotechnology.

Paper submission and deadlines: To encourage timely reporting of the latest results and to have better opportunities to expand papers for possible journal publications, prospective authors are invited to submit a 2-page paper (both initial submission and final version, if accepted) in English and in IEEE Xplore PDF format. The paper should emphasize original contributions and key findings ...

In this paper, we describe a new design of laser diode driver system based on MOSFET current mirror and

digital signal controller (DSC). The system is designed to emit stream pairs of photons from three semiconductor laser diodes.

You are invited to upload full papers using the ICM2018 Electronic Submission Portal below. Regular papers should be prepared with the official IEEE paper template of no more than 4 pages including results, figures and references. Your submission should contain sufficient details to allow for critical review.

Wire bonding is the method of making interconnections (ATJ) between an integrated circuit (IC) or other semiconductor device and its packaging during semiconductor device fabrication. Although less common, wire bonding can be used to connect an IC to other electronics or to connect from one printed circuit board (PCB) to another. Wire bonding is generally considered the most cost-effective and ...
