Genetically modified maize is a genetically modified crop. Specific maize strains have been genetically engineered to express agriculturally-desirable traits, including resistance to pests and to herbicides. Maize strains with both traits are now in use in multiple countries. GM maize has also caused controversy with respect to possible health effects, impact on other insects and impact on other ...

A high-voltage, direct current (HVDC) electric power transmission system (also called a power superhighway or an electrical superhighway) uses direct current for the bulk transmission of electrical power, in contrast with the more common alternating current (AC) systems. For long-distance transmission, HVDC systems may be less expensive and suffer lower electrical losses.

The ability of the TA.XTPlus to repeatedly measure the physical properties of very small beads is illustrated by performing resilience, relaxation, and burst tests on very small beads. Test results include strength, firmness, resilience, springiness, stiffness, and energy loss. The TA.XTPlus Texture Analyzer can be customized to accurately and repeatedly test any size beaded material.
